

Nice and relaxed atmosphere. I like the structure of white rose. It helps me to learn to.

Children being happy doing maths

Good that topics are broken down and build up slowly

Would love more of these sessions

I would like help with the interpretation of reading questions (Is there an easier way of breaking the questions down.

This has been a very useful session.

Support given to children who need it is second to none.

Could we continue to get feedback on gaps so that we can help at home?

Surprised by what they have to learn

Would like a bar model demo

I enjoyed the opportunity to just being able to come and sit with my child in school to see how he learns.

Teachers know which children require help and the help is targeted.

I would like to see the children work books

I would like to know in advance what the topics are.

Thank you
